APPENDIX D
Section 106 of the National Historic Preservation Act Process under the Proposed Programmatic Agreement
Section 106 of the National Historic Preservation Act Process under the
Section 106 of the National Historic Preservation Act Process under the
Section 106 of the National Historic Preservation Act Process under the
Section 106 of the National Historic Preservation Act Process under the

Section 106 Process under the Proposed Programmatic Agreement for the Small Erosion Repair Program

DWR identifies a group of erosion repair sites subject to management under the program

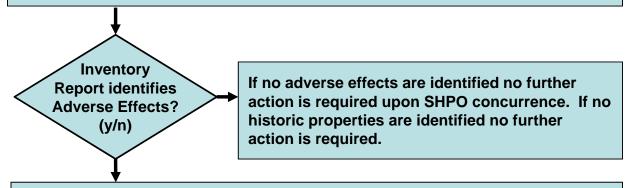

Are specific sites exempt as provided for in Stipulation IV and 36 CFR 800.3(a)(1) (for example, because the site or sites are located on an engineered structure or a landform of recent geological origin)?

If no, proceed to implementing Stipulation V. DWR shall prepare in one report and USACE shall review:

- a) a map of the Areas of Potential Effects (APEs),
- b) an inventory of the APEs,
- c) an evaluation of identified resources, and
- d) a finding of effect for resources that are recommended eligible for listing on the National Register of Historic Places (NRHP).

SHPO then reviews these findings after USACE.

If yes DWR either selects from the palette of treatment protocols developed under the Program HPTP or develops resource specific treatment. Construction may proceed either after treatment is implemented or prior to treatment in compliance with Stipulation VI(H).
